

SCMB POSTGRADUATE RESEARCH PROJECT

WEEK THREE CHECKPOINT - REFLECTION

Student Name	Georgia Wyldbore	Supervisor Name	Gabriel Foley
Student ID	43235779	Course Code	BIOX 7005

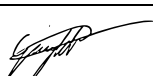

Note: this is not a formal piece of assessment for the student. Just a tool to help them gauge how effectively they are meeting the research project learning outcomes and to provide support (perhaps through referral) to both student and supervisor to overcome any challenges.

Providing feedback to student regarding their progress

Please use the table below to record the status and agreed action points where appropriate. If there are issues identified, please indicate discussed remedial action in the comments section. Please also use the comments to highlight any specific points where the student is doing well.

Learning Outcomes	Green	Amber	Red	Comments
Critical analysis of literature.		●		
Design and conduct a research project.		●		
Design, organisation and execution of experiments.		●		
Communication skills (written and verbal).	●			
Understand the professional expectations of working in a laboratory/research group/industry and be able to engage effectively in the workplace.	●			
Areas for professional/personal development: To be clear, the Ambers here are really just because the exact scope of the project is still being worked through - Georgia is perfectly competent in communicating and understanding the project as it stands so far and I have no doubt she will be able to develop and conduct a strong analysis.				

Supervisor Signature		Date	7/08/2024
Student Signature		Date	9/08/2024

Please submit this form through the submission portal in Blackboard.
